

# Product Information for the Handling of Compressed Air Cylinders

**Dear target shooters, please only use our recommended original compressed air cylinders for the respective weapons and strictly follow the instructions in the manual!**

- Do not use the compressed air cylinder longer than 10 years.
- After 10 years from the manufacturing date the compressed air cylinder must be emptied according to the manual.
- Operator control! The shooter is responsible to observe all rules and regulations, which are also part of the manual.
- We do not assume any responsibility for any damage that might arise from modifying parts, the use of parts which are not original or the non-observance of the manual.
